NEW SEMESTER STARTS – 02/05/2014

SEMESTER IS OVER - 01/28/2014

Unit 6

Most important things I've learned from this unit:

- 1 – Security is a complex issue that is affected by many factors
- 2 – Identity theft and cyberterrorism are two serious issues that more and more organizations are realizing the importance of
- 3 – Policies and procedures can basically make or break a company

Important Terms

Ergonomics - the science of designing machines, products, and systems to maximize, the safety, comfort, and efficiency of the people who use them.

Using Managed Security Service Providers (MSSPs)

Password sniffer - small program hidden in a network or a computer system that records identification numbers and passwords

Wow Eddie you went above and beyond in your research, pictures and overall post for this units DB. Your pictures were very informative and helpful in proving your point towards the sources of energy. It not only allowed one to know exactly what was going on but it gave all the materials which produced the source and painted a clear picture of what could be expected. I learned a great this week from your posts alone, thank you for sharing this information with us all. Great job all around.

Hi Eddie!

College Journal

Couldn't have asked for better this week. Your investigation clearly demonstrates you understand the scientific method and its role in investigating any issue. Thanks for the well-organized easy to read project. One of the best I have seen in all my semesters at Kaplan U :)

Professor

Hi Eddie- Thanks for responding this week, appreciated your article "Why Music Makes You Happy"! that is a great reference and I plan on keeping it for my future classes :) love the cartoons also. Appreciate your thorough posts to the class – as a professor, it's good to have that support. :)
